Arxium – Leader of DAO

Genesis Relic of the ZARUverse — where symbolism meets utility.

Whitepaper v1.0

1. Introduction

Arxium – Leader of DAO is the genesis token of the *Arxium Relics* collection, a mythic NFT series built on **BNB Chain (BEP-721)**. It is more than a collectible—this relic confers decentralized leadership, staking access, and lore-based governance within the **ZARUverse** ecosystem.

2. Vision

To build a branded crypto realm where **symbolism** carries real **utility**. Every relic encodes narrative, function, and status. The Leader of DAO is the first throne—uniting code, community, and myth into a verifiable asset.

3. Token overview

Attribute	Value
Token Name	Arxium – Leader of DAO
Token ID	1
Standard	BEP-721
Blockchain	BNB Smart Chain
Contract Address	0x57664ea40e95636ed7a4df35f4b31e3656a851cd
Deployer	Makese Holding (Founder: Parsa)
Metadata	Includes lore hooks, symbolic tier, and staking eligibility flags

4. Utility

- **DAO Governance:** Grants voting rights in the ZARUverse DAO for verified holders.
- **Staking Access:** Enables access to ZARU token rewards via designated pools.
- **Lore Unlocks:** Reveals hidden mythic chapters bound to token ownership.
- **Symbolic Identity:** Represents cryptographic authority and sovereign leadership.

5. Ecosystem: ZARUverse

The ZARUverse is a decentralized mythic realm governed by relics. Each NFT in the Arxium Relics collection fulfills a role—some as guardians, some as heralds, and one as the **Leader of DAO**. Core components include:

- **ZARU Token:** Native token for governance and staking incentives.
- **DAO Portal:** Voting interface for relic holders and community proposals.
- **Lore Engine:** Unlockable story content tied to token state and on-chain events.
- **Staking Pools:** Reward mechanisms for eligible relics and contributors.

6. Roadmap

Phase	Milestone
Phase I	Deploy BEP-721 contract on BNB Chain
Phase II	Mint Leader of DAO #1 and publish metadata
Phase III	Launch staking and lore unlock modules
Phase IV	Enable DAO voting via ZARU token
Phase V	Expand Arxium Relics with tiered symbolic roles and utilities

7. Branding and IP

Smart contract code: Open-source under MIT license.

Branding, visual assets, lore: Proprietary under Makese Holding. Unauthorized use is prohibited.

9. Final note

"This relic is not just a token. It's a throne."

Welcome to the ZARUverse.
